

Versi Indoor Kiosk

Sleek and versatile freestanding digital display in non-touch for advertising or PCAP touch for interactive applications.

www.lamasatech.com

Versi floorstanding digital signage kiosk

Strong WiFi connectivity

The kiosk features 2 high gain antennas for a strong WiFi connection.

Choice of screen size

Select from a 43" or 55" screen to suit your requirements.

Single-sided or double-sided

Choose from a single-sided or double-sided kiosk to maximise your audience.

Ultra slim bezel

Measuring at just 13.6 mm, the frame around the screen is the slimmest on the market, ensuring no distractions from your content.

700 nits high brightness

With a rating of 700 nits brightness your signage will be crystal clear even in bright locations such as retail stores with a lot of artificial lighting.

Anti-glare toughened glass

The toughened glass is resistant to glare from natural and artificial lighting and is designed to withstand damage in public environments.

Touch or non-touch

Choose an interactive PCAP touch screen or a passive non-touch display for advertising and signage.

Plug and play

Play your content via USB or run your application from the integrated Android 11 SoC.

Auto power

In case of power cuts and outages the kiosk will automatically power on when the power is re-instated.

Connect your PC

For applications that require a Linux/Windows PC or a more powerful graphics card, connect your own PC with HDMI in. Internal brackets ensure the PC is neat and self-contained within the kiosk frame.

Tamper-proof design

All ports are concealed to prevent from tampering in public environments.

Concealed cabling

Power provision is neatly concealed running through the side of the kiosk or from below.

Increase footfall and customer engagement

The Versi Indoor kiosk is a sleek and slimline digital signage display that will boost your advertising reach, increase footfall and inform and engage your customers. It is ideal for a range of environments including retail stores, shopping malls, restaurants, universities and more.

Touch screen

The PCAP touch screen model offers interactivity for your audience, perfect for information points. They'll be able to interact with your signage in a memorable way - a benefit which traditional print signage cannot offer you.

Plug and play

Run your content or application in minutes using the embedded Android SoC. Alternatively, connect your own PC which can be housed neatly within the kiosk frame. Power your PC from the built-in DC power port with no additional power provision required (subject to required power consumption).

Optional CMS

Control your digital signage remotely from any device with an internet connection by subscribing to our cloud-based digital signage system. Create new messages quickly with the drag-and-drop content builder and publish live on your kiosks in seconds.

Connect accessories

Boasting 6 USB ports, the Versi suits a range of requirements, allowing expansion with accessories e.g. printer, payment terminal etc. Power your accessory from the built-in DC power port with no additional power provision required (subject to required power consumption).

Customise your kiosk

The Versi can be easily adapted for custom designs and projects including self-service kiosks with payment modules. Contact us to discuss your project.

Robust components

Manufactured to the highest standards with commercial-grade components, the Versi is designed to run seamlessly 24/7 with an average lifespan of over 50,000 hours.

3-year warranty

The Versi Indoor kiosk is provided with a standard 3-year warranty included for your peace of mind.

Choose from single-sided or double-sided

Single-sided

Choose from single-sided or double-sided

Double-sided

Pick the base that's right for you

Choose from a small or large base to suit your aesthetics and space.

The small base is a sleek design for freestanding advertising displays, which must be bolted to the floor for stability. The large base is recommended for touch screen applications for added stability or if you are unable to secure the kiosk to the floor.

Small base

Large base

All-in-one HD camera and sound bar

Complete your freestanding kiosk with our HD camera and sound bar, perfect for:

- Audience and engagement measurement
- Customer service and AI applications e.g. customer help points using direct call connections
- Entertainment applications e.g. selfie cam and interactive AR photo booths

Adapt the camera angle easily from the top of the kiosk using the adjustment wheels to set the best angle for your environment. The advanced facial recognition sensor ensures the user is in focus even when there is bad visibility conditions in the background, such as glare and backlight.

The advanced noise cancelling and echo cancelling microphones eliminate any background noise and maximise the voice level of the individual engaging with the kiosk. Two front-mounted speakers produce directional sound to the individual, allowing clear 2-way communication via the kiosk.
